THE LABOUR FORCE, VICTORIA, NOVEMBER 1989

INQUIRIES Inquiries concerning these statistics may be made by telephoning Information Services (Labour force statistics) on Melbourne (03) 615 7000; for advice on the interpretation of these statistics ask for Neville Holbery.

MAIN FEATURES

In November 1989, the Victorian unemployment rate was 4.5 per cent (97,200 persons). The trend series in the graph below show the Victorian unemployment rate was consistently below that for Australia. The median duration of unemployment in Victoria was 12.0 weeks.

In the twelve months prior to November 1989, total employment rose by 4.6 per cent to 2,077,600 persons. Teenage employment for Victoria has grown by 8.5 per cent in the year to November 1989, to 184,400 persons. The teenage unemployment rate of 13.1 per cent remains twice that of the next highest group, but is marginally lower than the 13.5 per cent of one year ago.

The unemployment rate in the MSD was 4.2 per cent compared with the rate of 5.2 per cent for the balance of Victoria. The female unemployment rate varied markedly from 4.8 per cent in the MSD to 7.6 per cent for country Victoria. The corresponding male unemployment rates of 3.7 per cent in the MSD and 3.5 per cent in country Victoria showed little variation. The Western region of the state recorded the highest unemployment rate of 6.8 per cent for all persons while the lowest rate of 2.2 per cent occurred in the Outer Eastern Melbourne region.

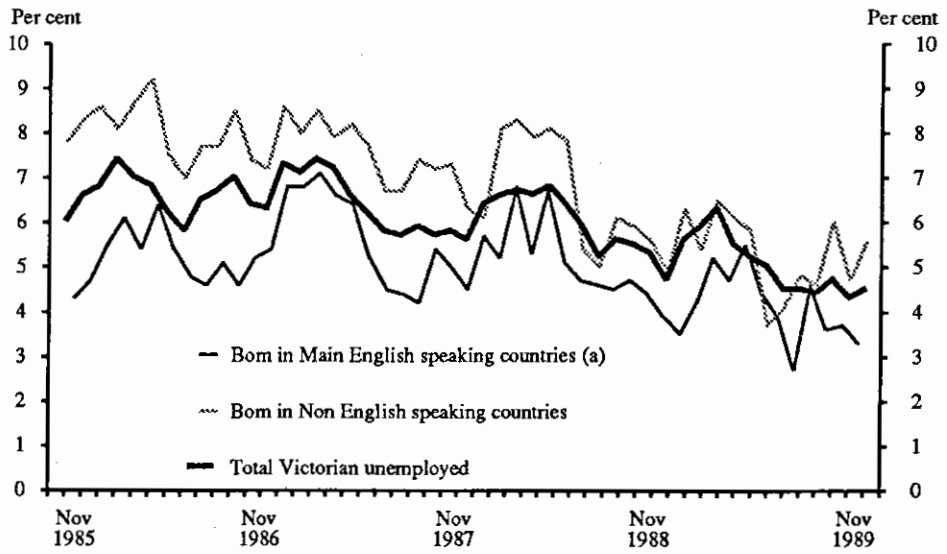
(a) Because it is not practicable to ascertain the birthplace of persons in institutions (who are classified as 'not in the labour force'), labour force participation rates for persons classified by birthplace are calculated by using population estimates which exclude those in institutions.
(b) Comprises United Kingdom and Ireland, Canada, United States of America, South Africa, and New Zealand.

UNEMPLOYMENT RATES OF MIGRANTS (BY BIRTHPLACE) AND TOTAL UNEMPLOYED, VICTORIA



(a) Comprises United Kingdom and Ireland, Canada, United States of America, South Africa, and New Zealand.

TABLE 4. CIVILIAN POPULATION AGED 15 YEARS AND OVER BY LABOUR FORCE STATUS AND FAMILY STATUS, VICTORIA, NOVEMBER 1989

Family status	*Employed*			*Unemployed*	*Labour force*	*Not in labour force*	*Civilian population 15 years and over*	*Unemployment rate*	*Participation rate*
	Full-time ('000)	*Part-time ('000)*	*Total ('000)*	*('000)*	*('000)*	*('000)*	*('000)*	*(per cent)*	*(per cent)*
Member of a family -									
Married -									
Husband -									
With children (a)	407.7	7.9	415.6	8.1	423.7	16.7	440.4	1.9	96.2
Without children (a)	323.4	22.6	346.1	7.1	353.2	199.2	552.4	2.0	63.9
Wife -

(a) Persons with jobs who did not work during the survey week have been included in the calculation of average weekly hours worked. The relative standard errors of these estimates are obtained by first finding the relative standard error of the estimate of the total number of persons in the estimate (see Table A), and then multiplying by a factor of 0.7. For further information refer technical notes in The Labour Force, Australia (6203.0)(monthly). (b) Comprises health; education, libraries, etc.; welfare and religious institutions; and other community services. (c) Comprises electricity, gas, and water; communication; and public administration and defence.

Aged 20-24	31.1	*39.9	35.0	..	..	..
Aged 25 and over	66.4	24.4	44.7	..	..	..
All ages	**48.8**	**25.6**	**36.7**	..	..	..
Median duration (b) -						
Aged 15-19	*13.0	10.0	12.0	..	..	..
Aged 20-24	*8.0	*4.0	*8.0	..	..	..
Aged 25 and over	29.0	8.0	12.0	..	..	..
All ages	**15.0**	**8.0**	**12.0**	..	..	..

(a) Period from the time a person began looking for work, or was laid off to the end of the survey week. Periods of unemployment are recorded in complete weeks resulting in a slight understatement of duration of unemployment. (b) For information regarding the calculation of standard errors, refer to technical notes in The Labour Force, Australia (6203.0)(monthly)

Introduction

This publication contains Victorian labour force estimates derived from the Monthly Population Survey conducted throughout Australia each month by the Australian Bureau of Statistics.

2. The survey is based on a multi-stage area sample of private dwellings (houses, flats, etc.) and non-private dwellings (hotels, motels, etc.) and covers about one-half of one per cent of the Victorian population. The information is obtained from the occupants by trained ABS interviewers.

Scope of survey

3. All persons aged 15 years and over are included in the survey except:

- *(a)* members of the permanent defence forces;
- *(b)* certain diplomatic personnel of overseas governments;
- *(c)* overseas visitors holidaying in Australia; and
- *(d)* members of non-Australian defence forces (and their dependants) stationed in Australia.

Definitions

4. The labour force category to which a person is assigned depends on his or her actual activity (i.e. whether working, looking for work, etc.) during the survey week. The definitions conform closely to the standard definitions recommended by the ILO.

Employed persons comprise all those aged 15 years and over who, during the survey week:

- *(a)* worked for one hour or more for pay, profit, commission, or payment in kind in a job or business, or on a farm (including employees, employers, and self-employed persons); or
- *(b)* worked for one hour or more without pay in a family business or on a farm (i.e. unpaid family helper); or
- *(c)* were employees who had a job but were not at work and were:
  - *(i)* on paid leave;
  - *(ii)* on leave without pay for less than four weeks up to the end of the survey week;
  - *(iii)* stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks, up to the end of the survey week;
  - *(iv)* on strike or locked out;
  - *(v)* on workers' compensation and expected to be returning to their job; or
  - *(vi)* receiving wages or salary while undertaking full-time study; or
- *(d)* were employers, self-employed persons or unpaid family helpers who had a job, business, or farm, but were not at work.

Unemployed persons are those aged 15 years and over who were not employed during the survey week, and:

- *(a)* had actively looked for full-time or part-time work at any time in the four weeks up to the end of the survey week and were:
  - *(i)* available for work in the survey week, or would have been available except for temporary illness (i.e. lasting for less than four weeks); or
  - *(ii)* waiting to start a new job within four weeks from the end of the survey week and would have started in the survey week if the job had been available then; or
- *(b)* were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the survey week (including the whole survey week) for reasons other than bad weather or plant breakdown.

The *labour force* comprises all persons who, during the survey week, were employed or unemployed, as defined above.

The *unemployment rate* is the number of unemployed in each group as a percentage of the labour force in the same group.

The *participation rate* is the labour force in each group as a percentage of the civilian population aged 15 years and over in the same group.

Full-time workers are those who usually work 35 hours a week or more and others who, although usually part-time workers, worked 35 hours or more during the survey week.

Part-time workers are those who usually work less than 35 hours a week and who did so during the survey week. When recording hours of work, fractions of an hour are disregarded.

Hours of work. The figures of aggregate hours and average hours refer to actual hours worked during the survey week, not hours paid for.

Persons not in the labour force are those who, during the survey week, were not in the categories 'employed' or 'unemployed'.

Marital status. In the labour force survey, persons are classified as *married* or *not married.* Persons are classified as married, if they reported as being married (including de facto) and their spouse was a usual resident of the household at the time of the survey.

Revision of series

5. New benchmarks based on the results of the 1986 Census of Population and Housing are now available and were introduced in the February issue of this publication. Labour force estimates have been revised for the period January 1984 to January 1989. All estimates produced after January 1989 will be based on the new benchmarks.

6. Commencing with the April 1986 labour force survey, the definition of employment has been extended to include all persons who worked without pay for one hour or more in a family business or on a farm (i.e. unpaid family helpers). More details about this change, together with other changes made to the questionaire, are contained in *The Labour Force, Australia, April 1986* (6203.0) and in an information paper *Questionaires used in the Labour Force Survey* (6232.0).

Status of worker

7. Status of worker is classified by occupational status, i.e. whether they were employers, self-employed persons, wage and salary earners (employees), or unpaid family helpers (who worked one hour or more in the survey week).

Classification of industry and occupation

8. Industry is classified according to the Australian Standard Industrial Classification (ASIC), 1983 and occupation according to the Australian Standard Classification of Occupations (ASCO), 1986. Occupational data classified to ASCO were introduced for the August 1986 survey, replacing the Classification and Classified List of Occupations, Revised, November 1980 used in previous surveys. The appendix in the August 1986 issue of *The Labour Force, Australia* (6203.0) contains a more detailed explanation of the concepts and structure underlying ASCO. Industry and occupation classifications are only available quarterly (i.e. each February, May, August and November).

Victorian regions

9. Detailed maps of the Labour force regions are presented at the end of this publication. Users should note that from September 1987 there have been some significant changes made to the number and composition of Labour force regions for the Melbourne Statistical Division. These changes are presented in the maps mentioned above.

Reliability of estimates

10. Since the estimates in this publication are based on information obtained from occupants of a sample of dwellings they, and the movements derived from them, may differ from the figures that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error of an estimate. Standard errors of survey estimates and month to month movements calculated for all regions are shown on pages 28 and 29.

As the above problems are compounded when the statistics are disaggregated to regional data, users are particularly advised to treat month to month movements for regional data with caution. An explanation of standard errors and their use can be found in the technical notes of *The Labour Force, Australia*, (6203.0) (monthly).

11. Labour force survey estimates are calculated in a way as to add up to the independently derived estimates of the population aged 15 years and over by age and sex. Regular independent estimates of the population at the regional level are not available for use as benchmarks in the manner described above. Therefore users should not use the data in this publication as a means to calculate the civilian population aged 15 years and over within each region.
